Majesteit,

5 Januari 2021.

I write to you in the most popular international language and explain why.

The inquiry report "Unprecedented Injustice" ("Ongekend Onrecht") is, once again, solid evidence that the Human Rights not exist in the Netherlands. Once again is the opportunity with full awareness not used, to measure the Contracting State's doing or not-doing against the measure stick of the European Convention for the Protection of Human Rights and Fundamental Freedoms.

The Contracting State "the Netherlands" commits breach of contract and is not able to stop the breaching, repair the ruins and compensate adequate the unrepairable damage.

This is another message in a considerable number to the Dutch King, after the previous ones are deleted with scorn abuse of "an individual case" or "independency of the judge". This evidences indisputably the begging to return all of our stolen Human Rights, which begging as solely fact evidences the absence of even the tiniest fundamental Human Right.

So, the international public community must know to enable its lawful public scrutiny with the correct and complete information to fulfil its legal task to judge. The King, each member of the government(s), each member of the parliament(s), each citizen, resident and private individual can access sufficient information at the site www.publicsrcutiny.nl for 24 hours of each day. As the King know already for four years is information about the crimes of courts, its tribunals or judges and the judiciary in the webdossier www.de-openbare-zaak.nl, also accessible for 24 hours of each day.

After these four years, then in December 2020 I read in the report "Unprecedented Injustice" ("Ongekend Onrecht") that the members of that inquiry (quote): "By this summation of inability to do justice to the individual, has kept parents from having a chance. During its activities, the commission came to this realization first with surprise and finally with deep indignation. It urges all concerned state powers to consult themselves on how to prevent a recurrence in the future and how to correct the injustice that has arisen.". (page 8, first whole paragraph). The King cannot share to be surprised: the King knew for four years and do not act at all.

(Verify in Dutch: "Door deze optelsom van onvermogen om recht te doen aan het individu, hebben ouders jarenlang geen schijn van kans gehad. De commissie is gedurende haar werkzaamheden eerst met verbazing en uiteindelijk met diepe verontwaardiging tot dit besef gekomen. Zij doet een dringend beroep op alle betrokken staatsmachten om bij zichzelf te rade te gaan hoe in de toekomst herhaling kan worden voorkomen en hoe het ontstane onrecht alsnog kan worden rechtgezet.").

All the State Powers in the Netherlands, including its King, ought to be filled with pressing shame that the crimes of Dutch courts, tribunals or judges and judiciary is left

uncondemned and is not instantly ruined as the destructed Human Rights safety net for the millions of private individuals with a low status. **Note:** the number is not significant at all for the Human Rights, it is significant for the size of the criminalities.

Some humans communicate like me and some communicate in the language of violence. But in the end we are united and each individual wants to have returned our possessions: the Human Rights and Fundamental Freedoms. The violence nowadays in the society has a legal origin and a legal goal, while the manner of doing or talking is determined by the circumstances in the level of resistance or cooperation. So, the violence is at the most 50% a people's guilt, while they only are condemned. The public scrutiny does not follow this condemnation.

Finally

The Dutch King swore an oath in the world's public, (quote): "that I will protect the freedom and rights of all Dutch and all residents, as a good and faithful King is guilty to do.". So, the King commits perjury and remains to combat against the Human Rights.

As the first step is firstly the King instantly obliged to eternally destruct completely each possibility for each of the Contracting State's bodies or authorities (including the King, the Courts, its tribunals or judges and judiciary) to compel each private individual to beg for returning his lawful possession of all Human Rights. Article 5 of the Constitution still enables illegal, for the Dutch King to hide behind the human shield of his "Cabinet of the King".

This letter is accessible for the world's public at www.publicscrutiny.nl, to avoid another pricey registered post and a scorn rejection or deletion.

Pending for satisfactory action(s) within a reasonable (short) time, for each private individual with low status.

Yours sincerely,
<sender>
