Good day High Commissioner for Human Rights, Mrs. M. Bachelet Jeria. I have informed you that several open messages have been released here. You still do not answer and you do nothing. The open messages here, including those to the Dutch parliament, the Government and also to the Dutch judiciary, are evidence that solely the civil service only speaks the language of violence. Ignoring ALWAYS escalates and war is the final stage. This can be verified in history. One of the two belligerent presidents said one time that peace can only come if he comes into direct conversation with the other president. The civil service immediately prevented this and after one time nothing more was heard from him about this. Punishments have been imposed on one fighting party by officials from 'the west'. Only through money and trade. The transport of gas and oil is not blocked because it burns one's own fingers. This proves that 'the west' only thinks in the power of money; 'Independent justice' is bought from Poland. But human rights cannot be bought or traded because they are inalienable; so worthless in the world of money!! In the Netherlands, persons who trade in women to abuse them in prostitution have been released to fight in the war and against the punished party. Mrs M. Bachelet Jeria, your icy silence is also an declaration of your willing. You do not want to reduce your current employment. You want to maintain the function of the human shield. You do not want to restore human rights. You don't want to use the opportunities created by each open message. But =true= peace does not bring power to the civil service but to democracy. Human rights do not reverse roles because this does not improve anything. In =true= peace, the legal public control has the final verdict and the civil service, including the High Commissioner, does not (yet) want this. Steering by the open messages also remains necessary in order to make public scrutiny again of this information possible. Until the clique above the latent discrimination line (open message 28-03-2022) makes intervention by this scrutiny unnecessary. The High Commissioner for Human Rights, Mrs. M. Bachelet Jeria, gets help with a diagnosis > A war is unstoppable, a war only dies out. If the escalation to war enters a more horrific phase, it has gone wrong in the phase(s) before it. In those preceding phase(s), the recovery must occur to stop repetitions. Always going back to the previous phase eventually leads to the onset of (mental) violence and to the (not yet existing) sound, capable tribunal that has to stop violence. It is generally acknowledged that ignoring (icy silence) is the worst form of bullying (mental violence). With regards.

Good day High Commissioner for Human Rights, Mrs. M. Bachelet Jeria. I have informed you that more open messages have been released here. You publish being the supreme boss of Human Rights. You don't reply to my previous open messages and you don't do anything. A war has been made AGAIN and the civil service is busy with itself in 'peace negotiations', the result of which is written down, already in 1948 (!), in the preamble of the UN's Declaration. This is the second foundation of the utter futility of 'peace negotiations'. And the High Commissioner in action is nowhere to be seen. Innocent civilians remain to be dragged in the totally senseless killing party and the "leaders" keep asking to take sides. This is the death-blow for human rights, because they do not take sides! After 74 years of UN Declaration, the "leaders" testify to their wisdom by continuing to humiliate and scorn each other. For the triumph of the worldwide damned "übermensch" who NEVER anywhere improved the living together. Madam High Commissioner, on the contrary, the civil population is making clear its unity against war plus that we NEVER wanted this. Individual civil citizens help each other regardless of nationality and who or what someone is and without a 'deal'. Demolition is committed by Amnesty International, which finds the Dutch 'judiciary' very good, which is now and therefore years too late, calling for a demonstration against war. AI is again hypocritical, because again there is no awareness that every demonstration is the empirical evidence that the people are not and

were not represented. AI too is jobless if the individual civil citizens live together in peace. This wakes up that every nation is made up of two groups, one being the civilian population and the other population are civil servants and state servants (see figure). Individual civil citizens are busy with the economy, by which with taxes the (semi) civil servants/officers are paid who do all the work of common interest. To stop the decline into violence, there is a police (or army) to keep the strong within the law, so that the weak too can enjoy their rights. All this has degenerated: to the present day situation where the individual citizen is oppressed (by the tribunals in particular) and war is made. Mrs. Bachelet Jeria and your human shield; There are demonstrations and violence and war, because otherwise there is less work for civil servants/officers when individual civil citizens live together in peace. With regards.

Good day High Commissioner for Human Rights, Mrs. M. Bachelet Jeria. I have informed you that already three open messages have been released here. You publish being the supreme boss of Human Rights and yet finally, a war is made AGAIN, now in Ukraine. You don't reply to my previous open messages and you don't do anything. The governments in "the west" are inciting each other and their citizens to take sides. These governments despise and humiliate the imaginary "enemy" and want this "enemy" to give up their beliefs while they themselves do not give up their beliefs of, among other things, scorn and humiliation. After apparently a minimum number of innocent civilians have been murdered and enough is destroyed, there come, UNEXPLAINLY, mediators for 'peace' but the High Commissioner is not there. The High Commissioner also does not force the two fighters to communicate publicly, via television, to stop war. Then suddenly officials from both camps are forced into "peace negotiations". As the killing continues, UNEXPLAINED, the differences are now being discussed. While this exact same 'conversation' should have happened years ago and if necessary submitted to a proper tribunal, but this one did and does not exist. In the "peace negotiations" this black hole in human rights is not/never talked about to destroy forever the cause of their war! In a war-free country, every legal process is ALWAYS a repetition of moves. But no tribunal speaks about this in order to keep the injustice-economy going. This crime is also not discussed, at how to go on in war-free condition. The officials (who are negotiating) are out for a new paper "deal" of which is already certain that no one will observe it. Because this is how the war started, because the author of the law or treaty is betrayed and each person/country pursues its own pseudo-interpretation despite the signing. Ms. Bachelet Jeria, High Commissioner for Human Rights, and your human shield; Even when innocent people are being murdered, the civil service remains busy with only itself. With completely useless work because they are afraid to get without (this) work in =real= peace condition and therefore without a (high) income. With regards.

Good day High Commissioner for Human Rights, Mrs. M. Bachelet Jeria. I have informed you that this open message is released here. You publish being the supreme boss of Human Rights and yet finally, after Yugoslavia or Syria, war has been made AGAIN, now in Ukraine. You don't reply after my open message. This is almost certainly caused by your administration, caused by your human shield. This is now focused on because war is very deadly. Even if you are just the speaker of your bureaucracy and a pickpocket, you are willing-end-knowing directing this. The only way to communicate with the High Commissioner for Human Rights, the competent authority, is by violence. Any non-violent way is sabotaged by your bureaucracy. This has crossed the threshold because there is no proper tribunal. Each tribunal consists of judicial officers who have been declared criminally

immune. The persistence of the civil service creates the escalation ladder of violence into finally war. Those who make mistakes must correct them. The world sees this in the people who are now 'negotiating' for peace: the civil service. The peace they themselves have sabotaged; ruthless into war. Each of the leaders come for a short while and go again, but the civil service remain. The High Commissioner and his human shield can be copied on presidents, kings, business leaders, army generals and all elites. Because whoever pays attention sees the same everywhere, so also the same revolt and the same violence; but it is only visible to the individual civil citizen below the latent discrimination line! Human rights do not take sides because everyone can be here. Also the imaginary "enemy" because, for those who pay attention, both sides are the same, but each does from its own culture. There is nothing wrong with this as international trade proves. High Commissioner for Human Rights, Mrs. M. Bachelet Jeria, there is still utter futility by the mutual massacre. The soldiers, for example from Ukraine, are honored as heroes. This is nothing better than 82 or 108 years ago. Below I send a picture of the certificate of honor of one of the many soldiers from WWI; the soldiers, especially the dead, whom all of us are now betraying. Just so will today's victims, who sacrifice their lives in war for security and peace, be betrayed. To avoid war, all violence must be directed against the cause: the civil service, persistent in sabotage. Please note: on the other hand with (now) the Russians it is exactly the same. With regards.

Open letter from facebook on March 6, 2022

Good day High Commissioner for Human Rights, Mrs. M. Bachelet Jeria. I have let you know that this open message is published here, because at last there is a war in Ukraine. You were personally warned about this on January 21, 2020. The response was icy silence and doing nothing. War NEVER happens suddenly. You and your administration bear the largest share of the blame for this war and I want to refresh this (again). You personally have been warned insistently that the justice system, both nationally and internationally, has crashed and is thus finally escalated into war. Now you have independent evidence that the judicial system is completely useless. The tribunal in Article 6 (ECHR) is intended to guarantee peace by applying the law and treaties as its author wills and intends. Violence of any kind is empirical evidence that the tribunal has failed completely. Public scrutiny is ignored by you and your administration with, as indicated above, icy silence and doing nothing. Pseudo-judges continued to feed the injustice economy with their own personal opinions, arbitrary and large numbers of decisions in equal cases. Due to the lack of "Fair Play" and justice, each individual citizen is forced to protect it's rights with their own measures. The power in the injustice economy has been copied in international tribunals. For years it is complained that Peace Palaces, International Courts and National Courts have become political institutions. The Council of Europe recently stated its intention to act as co-legislator through national judiciary. Due to the lack of "Fair Play" and justice, (for example) Russia is taking its own measures. Human Rights does not take sides and everyone can be here and everyone can be who he/she is. But the innocent fathers of innocent children are once again forced to kill each other. The clique evades this to vomit fighters language and show they have no idea how to kill the war. By this, I am instructing the High Commissioner to force both presidents to use television and publicly communicate directly with each other so that every citizen of Ukraine and Russia can control their representative in their deliberations to stop forcing innocent fathers to kill each other. After this, my order to the UN is to adopt the "Manual for the Public Scrutiny" (URL: www.publicscrutiny.nl) as a matter of urgency. With regards.
